FACC AFTERMARKET SERVICES

BEYOND HORIZONS

FACC AFTERMARKET SERVICES

REPAIR | REFURBISH | REPLACE

Headquartered in Austria with offices in the USA, Canada and China, FACC Aftermarket Services offers OEMs (Original Equipment Manufacturers), Operators, Leasing Companies and MROs (Maintenance Repair and Overhaul Stations) a unique range of Repair, Refurbish and Replace services to keep your Commercial Aircraft or Business Jet flying.

With more than 30 years of experience as an OCM (Original Component Manufacturer), FACC has a comprehensive range of know-how, tools, manpower, services and consumables, as well as all necessary approvals:

- EASA Part21 J;
- EASA, FAA, TCCA, CAAC Part 145;
- EASA Part21 G;
- EN/AS 9100 & 9110;

REPAIR

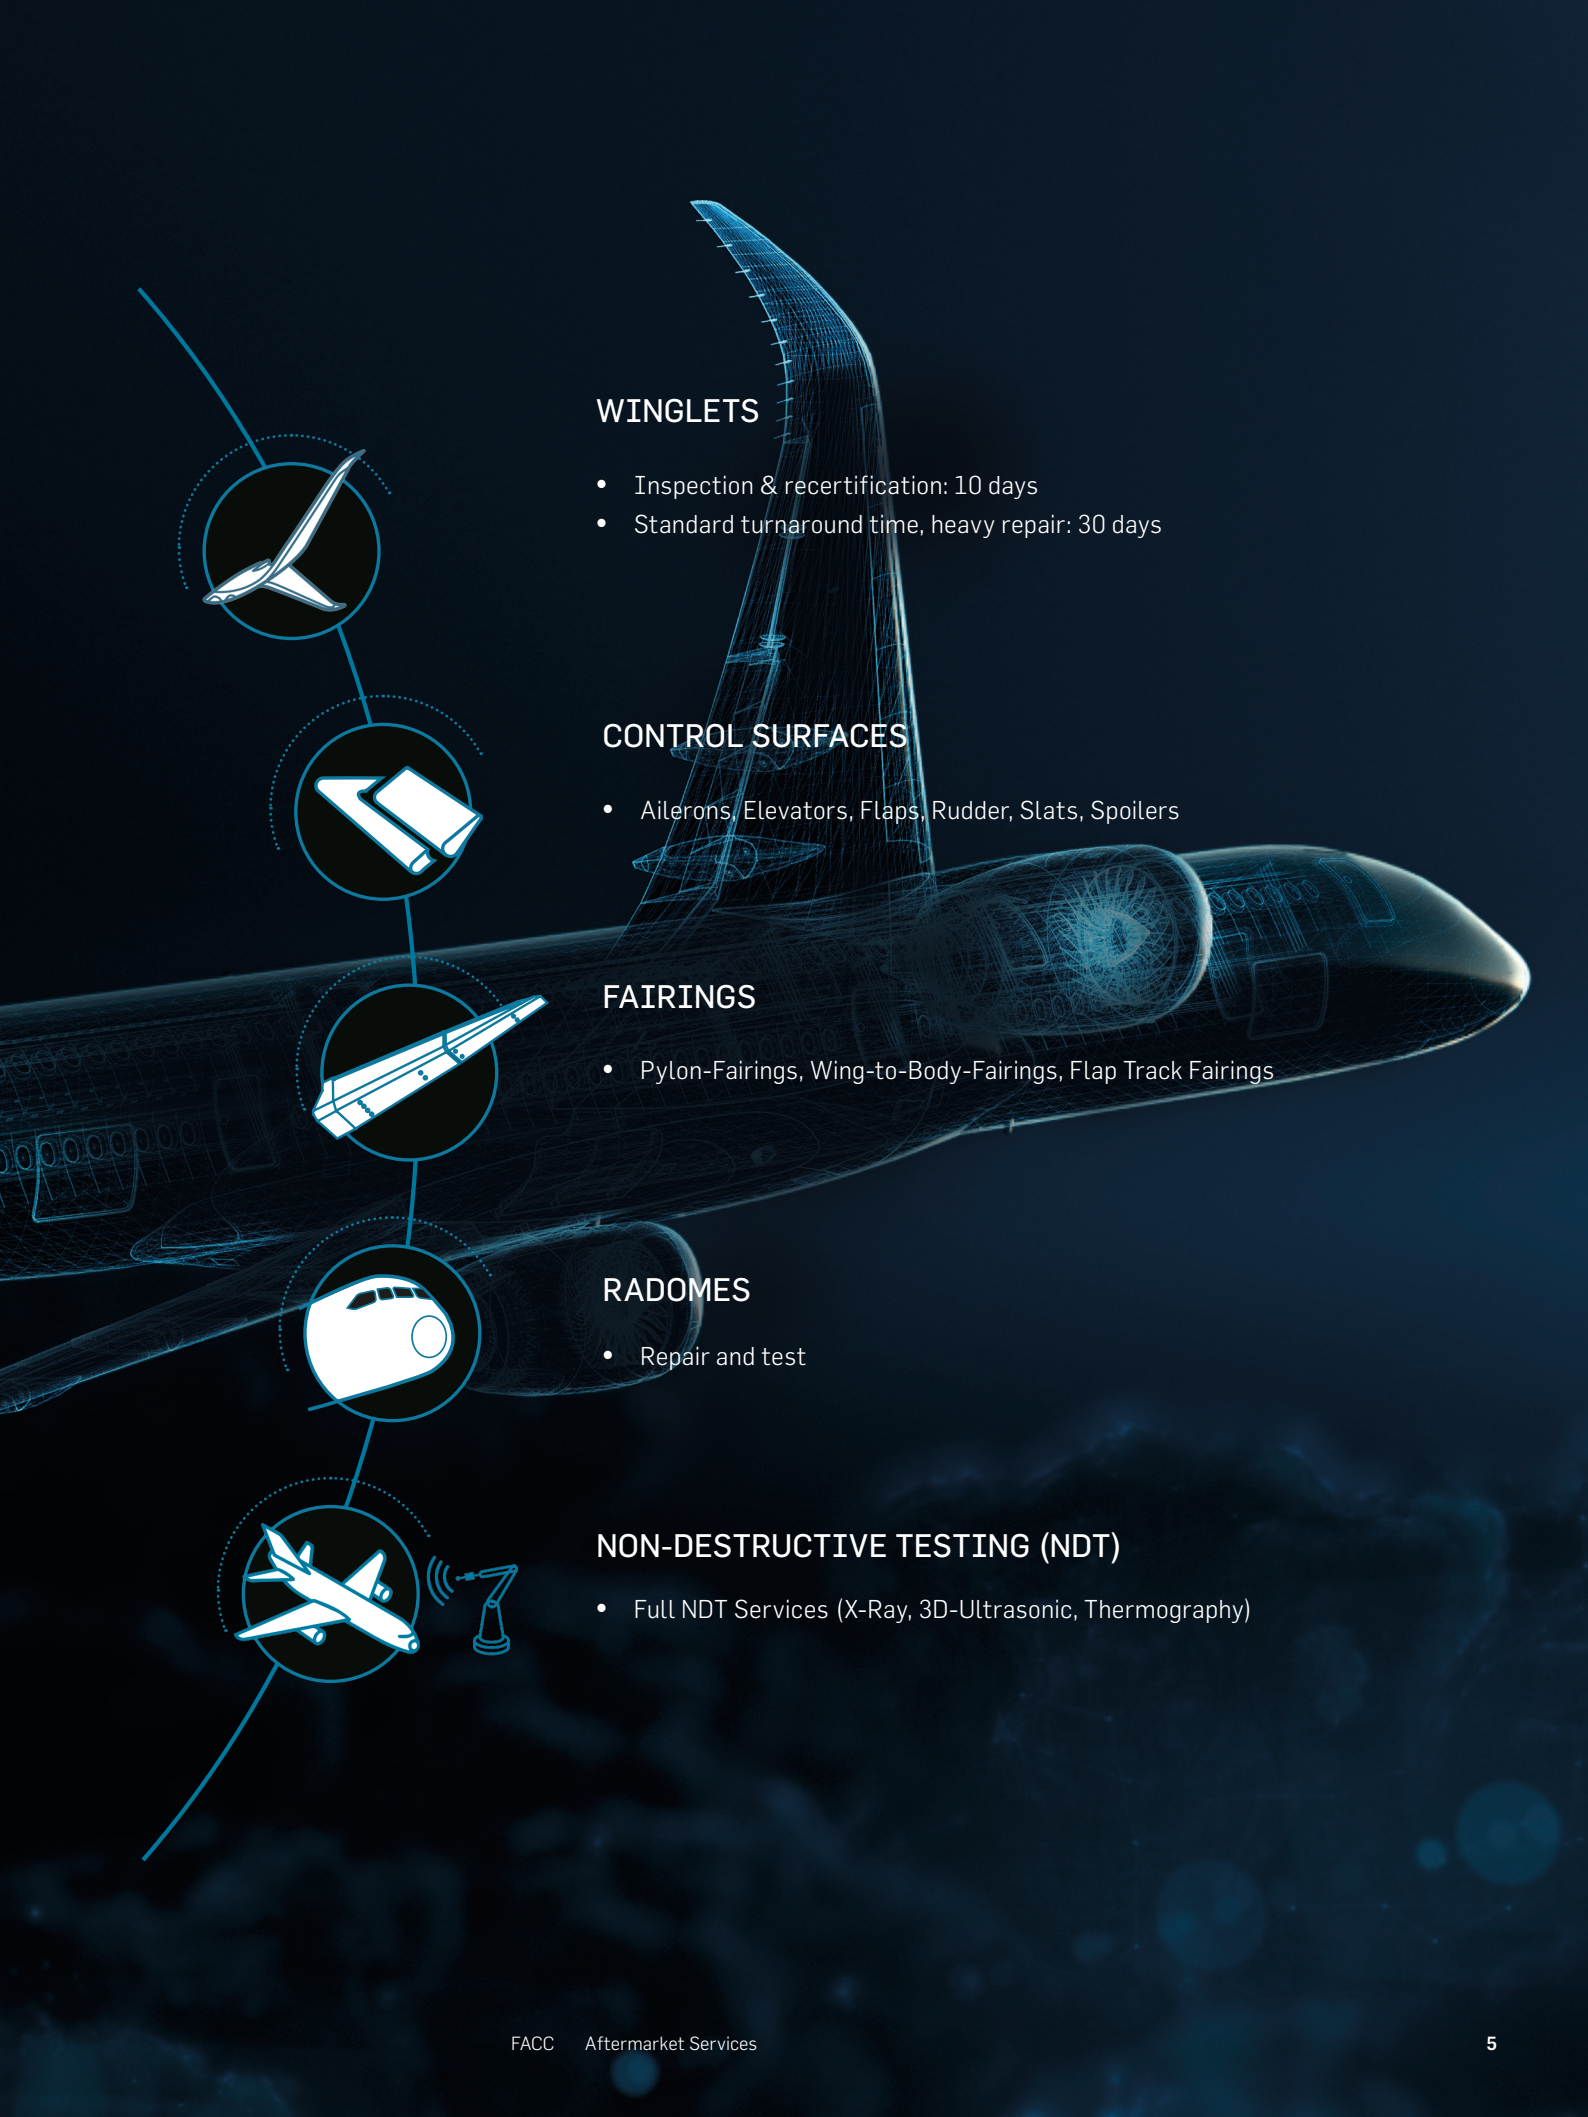

NEVER SCRAP YOUR COMPOSITE COMPONENT AGAIN

As an EASA, FAA, TCCA and CAAC Part 145 approved company with more than three decades of component manufacturing experience for leading OEMs, we perform repairs where others would be forced to scrap the part. Our MRO expertise in North America, Asia and Europe gives you the ability to repair parts instead of replacing them, with exceptional turnaround times at the most attractive price.

With its worldwide network, FACC is also a proven partner for major modification programmes to make flying even more environmentally friendly. Example given is the conversion of Blended Winglets® into Split Scimitar Winglets® on Boeing 737NG aircraft.

EXIT

BUSINESS JET : FEEL THE UNIQUENESS

Minor and major conversions not only provide more comfort and convenience in your business aircraft, but also ensure and increase its value.

REPAIR & REPLACEMENT

Even minor repairs or replacement of the certain interior components can have a great impact. Recovering the interior liners, seats, side ledges, baggage area or even the carpet can make your jet shine again. Our FACC team of specialists is also able to replace surface materials as well as repair cabinet surfaces and wood throughout the aircraft.

HIGH END REFURBISHMENT

Welcome to first class with our tailor-made integrated interior solutions. If you wish to completely renew the interior look of your aircraft, FACC's team of specialists comes into play. With our STC certification, engineering, design and craftsmanship skills, the sky is the limit. We offer everything from a single source from the first sketch of your new dream interior, to the high quality production. From the cockpit to the luxury cabin, from the galley to the lavatory, FACC can realize your dreams, all in a perfect blend of aesthetics, comfort and functionality.

CUSTOM INTERIOR & LAYOUT CHANGE

If you prefer luxury custom interior or even a complete layout change, you have come to the right place with FACC as well. You can even determine a new arrangement of seating, meeting and sleeping facilities. Our in-house interior design team offers you a range of cabin modifications, innovative designs, comprehensive layout changes and respective certification competences including the privilege of Major Changes – exceeding your expectations.

REPLACE

PART OF YOUR AIRCRAFT

As a design organisation (EASA Part 21 J) and production organisation (EASA Part 21 G), we bring innovative solutions to life. From scratch to certified customized solutions. From one source, of course - ours!

RepCOAT

- Permanent ice-repellent and self-cleaning coating
- For rotors and other exposed structural components
- Enables the best possible flight performance
